IIAFA2000V200	20

IT CAN BE HOOKED AND UNHOOKED IN ONE MOVE FOR A QUICK PURGE

Ideal as a terminal for drip lines. Thanks to the 8-figure end closure, developed by Irritec, the maintenance of the pipe is easy and functional.

Placed at the end of a dripline, it allows the pipe to be cleaned without removing it completely. Just turn it around, unhook it and in a very simple move you will be able to carry out all the desired operations on the installed pipe.
